### **REVIEW Aerial Acoustics 6T loudspeaker The Sound Advocate**

The Aerial Acoustics 6T was able to generate powerful, tuneful and believably accurate stereo sound images. Despite being a reasonably compact floor stander, they are quite heavy at approximately 70 pounds each while its build is virtually flawless in fit and finish.

### **Aerial Acoustics 6Ts Amazing Headphones Speakers**

I had the chance to sit down and listen today to the new Aerial Acoustics 6T speakers at Audio Advice in Raleigh, NC. What an amazing set of speakers. Looking at them, they dont appear that they will handle low-end very well due to the slim cabinet, but they do have dual 5.25 woofers in them. Bot

### **Aerial Acoustics Slims Down With New 6T Tower Speaker**

The \$6,000/pair 6T incorporates two 5.25-inch woofers, one 4-inch midrange and a 1-inch tweeter. According to Aerial Acoustics founder Michael Kelly, the speaker reaches down to 35 Hz and has an above-average sensitivity of 90 dB. I believe it, after hearing the speakers reproduce a heavy slapped-bass performance by Brian Bromberg.
