Abstract. This paper investigates the semantics of mathematical concepts in a type theoretic framework with coercive subtyping. **Approximation Suggestion and Analogy Translating Pain**

ABSTRACT . This paper addresses Elaine Scarry's contention that pain actively destroys language and therefore cannot be represented in words. I use Alphonse Daudet's notebooks, where he writes of the pains of syphilis, to show how literary strategies may translate the experience of pain so that sufferers, and those who observe the pain of others, may gain some understanding of it.
